

Energy Saving Facts & Tips

Shorter Showers Save Money

A 7-minute shower saves about \$60 per person per year compared to 15-minute showers.

Heater & Refrigerator Maintenance

Regular maintenance of your furnace and water heater now can help avoid a costly emergency repair later! Your refrigerator/freezer works harder when the coils get dusty and frost builds up.

Light Bulb Savings

While Compact Fluorescent Lamps (CFLs) use about 1/4 as much electricity to produce the same amount of light as a standard light bulb, Light Emitting Diodes (LEDs) use about 1/2 as much electricity as CFLs. LEDs cost a little more to buy, but will last longer and save on electric costs.
